AZALEA KAEMPFERI—QUALITY IN QUANTITY

We are able to offer you in quantity our Westcroft Hybrid Azaleas. Over 20,000 plants are available in a useful range of sizes and colors for spring.

HARDY—COLORFUL—TWO SEASONS' DISPLAY

After fifteen years of testing, these plants have proved hardier than existing varieties now on the market, and in quality are equal or superior. These new varieties were produced at Westcroft Gardens and selected from thousands of hybrids originated by Mr. Ernest N. Stanton. They will replace existing kinds because they are outstandingly well suited to Michigan's severe climate. These hybrids are persistent foliaged. They grow vigorously, bloom profusely even in the smaller sizes, and are exceedingly beautiful at the height of bloom. Many are equally attractive in the fall, with their red and yellow foliage.

EXTEND THE BLOOMING SEASON

In addition to the natural spreading Kaempferi growth habit, you are offered the choice of lower growing, dwarf plants for use with the ranch type home or the currently popular Japanese style garden. The selection offers you not only a choice of many colors and different growth habits, but also the chance to extend the period of bloom by three to four weeks when you choose several different varieties.

CAN BE ORDERED NOW

Our method of winter protection furnishes you a plant in prime condition and appearance. Order now for shipment during the planting season, or visit our showgrounds and see them in mass display during the blooming period, about May 20. See them—you'll want to use them in your planting. Once you have tried them, you'll recognize their superiority.

Variety	Name	Blooming Season	Color and Plant Description	Fall Color of Foliage
A. Kaempferi	Lake Ontario	Early	Light orchid	Orange
A. Kaempferi	Lake St. Clair	Early	Light rose-madder	Red
A. Kaempferi	Spreading Red	Early midseason	Vermilion; spreading plant	Orange-red
A. Kaempferi	Myrtleleaf	Midseason	Semi-double, bright coral-pink with myrtle-like foliage	Yellow
